

JOSH MCLAIN

Full-Stack Software Engineer | TypeScript, React, Node.js, Python, AI Applications

Phoenix, Arizona | 480-200-4615 | Me@joshmclain.com | LinkedIn.com/in/joshmclain45

PROFESSIONAL SUMMARY

Full-stack software engineer with approximately six years of experience building web and mobile applications, backend services, APIs, cloud infrastructure, and AI-powered features. Experienced in technical leadership, feature architecture, debugging, mentoring, and translating product requirements into maintainable software.

TECHNICAL SKILLS

Core: TypeScript, JavaScript, Python, SQL, React, React Native, Next.js, Expo, SvelteKit

Backend & Data: Node.js, Express, FastAPI, REST APIs, GraphQL, PostgreSQL, Supabase, Firebase, Prisma

Cloud, AI & Testing: AWS, Google Cloud, Docker, GitHub Actions, CI/CD, Jest, Vitest, OpenAI, Claude, Gemini, Llama, RAG

PROFESSIONAL EXPERIENCE

Rising Seer | Lead Software Developer

Remote | April 2026–Present

- Develop features and resolve engineering tickets for a React Native and Expo iOS application supported by Firebase and Google Cloud services.
- Make feature-level architectural decisions, identify implementation risks, and collaborate with leadership and developers.
- Investigate frontend and backend failures and improve reliability through validation, logging, error handling, testing, and platform hardening.

Dragon Cats | Freelance Software Developer and Founder

Remote | February 2024–Present

- Provide freelance development, maintenance, consulting, and troubleshooting for custom web applications.
- Manage client work from planning through delivery across frontend interfaces, backend services, APIs, databases, and deployments.

OneOrigin | Technical Lead

Scottsdale, Arizona — Hybrid | April 2023–July 2024

- Led technical execution and supported developers through implementation, debugging, code review, mentoring, and delivery.
- Built full-stack applications using TypeScript, React, Node.js, GraphQL, REST APIs, databases, and microservices.
- Translated product requirements into maintainable solutions while contributing to architecture, testing, deployment, and production troubleshooting.

Banyan Labs | Software Developer II

Remote | April 2021–October 2023

Transitioned to part-time from April–October 2023 while beginning the role at OneOrigin.

- Developed production frontend and backend features and reusable UI components using JavaScript, TypeScript, React, Node.js, and SQL.
- Integrated APIs, databases, and cloud services; diagnosed defects and delivered enhancements based on business requirements.
- Continued supporting active projects part-time during the transition to OneOrigin.

Persevere Code Camp | Teaching Assistant

Tucson, Arizona | November 2019–April 2021

- Supported students learning JavaScript, web development, debugging, and software-development fundamentals.
- Reviewed projects, provided individualized coding assistance, and taught readable code, version control, testing, and systematic debugging.

EDUCATION

Maestro College | Software Engineering and Computer Science Program

In Progress

Relevant coursework: data structures and algorithms, software engineering, Python programming, application development, algorithm analysis, and technical problem-solving.
